The domain approach of Turiel and colleagues has emerged as the dominant paradigm in the field of social development, moral development in particular.

[Social psychological determinants of the use of ...](#)

In this study, social influences are reflected in the subjective norms, social support and perceived behavior of referent groups that gym users identified in the interviews. Subjective norms were assessed by the gym user's perception of the normative beliefs of the gym owner, the instructor and the other gym users, as well as of friends, training partners and relatives.
